## KID'S BOOTS SIZE CHART

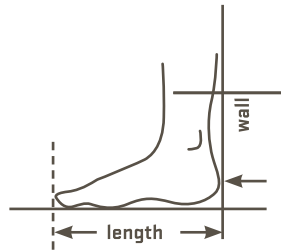

### Accuracy Check

Place credit card here. If this box is the same size as your card, the print scale is correct.

### If you have a printer:

- 1) Print guide at 100% scale
- 2) Cut the bottom of the size guide along the scissor line.
- 3) Tape the size guide to a hard floor with the curved line touching a wall.
- 4) Place one bare foot on the measurement guide, aligning heel with curved line.
- 5) Slide foot so heel is touching the wall.
- 6) Mark the first visible line past the longest toe.
- 7) Repeat with the other foot.

**Note:** If your child's feet are two different sizes, choose the larger one.

### If you do not have a printer, but do have a ruler:

- 1) Tape a plain piece of paper on a hard floor with the end touching a wall.
- 2) Place one bare foot on the paper, aligning heel with the end of the paper.
- 3) Slide foot so heel is touching the wall.
- 4) Mark the end of the longest toe.
- 5) Repeat with the other foot.
- 6) Measure the length with a ruler and compare the size in cm to the measurement guide to determine the correct size needed.

**Note:** If your child's feet are two different sizes, choose the larger one.
